Service Level Agreement

Etheric Networks provides a unique guarantee that beats any comparable broadband offering (i.e. high guaranteed baseline speeds; high burst/peak speeds) publicly published and currently accessible in subscriber's local area. Etheric Networks has been operating a proprietary high-speed broadband wireless network since February of 2003. The network maintains a high availability rate comparable to a wired connection. In the event of a service interruption:

1. Etheric Networks will provide service credits for reported service outages from the time they are reported.
2. Credit will be applied at a rate one day for every four hours without service to a maximum of 2 weeks of credit per month.
3. In the case of equipment failure outside of warranty, a field engineering visit can be requested at the rate of \$129.00 for the first hour and \$75.00/hr after that plus equipment costs.
4. For tree mounted equipment that requires a tree climber to access it, all related climbing charges are the sole responsibility of the client regardless of equipment warranty.
5. In the event of a 48-hour continuous service outage, or if 3 reported outages of more than 1-hour each in a calendar month are reported, the client may cancel service with no early termination penalty. Service outages must be reported within 24-hours to Etheric Networks support department for Etheric Networks to confirm the service interruption.

IP Service Specifications

1. Network availability: 99.93% single radio link; 99.99% dual radio link
